

The cure for the common sick day

(and sore throat, headache and sinus infection)

Virtual visits from Priority Health give you 24/7 access to care when your primary care doctor isn't available—including nights, weekends, holidays or while traveling.

After all, there's no convenient time to get a sinus infection.

Virtual visits are a great alternative to the emergency room (ER) or urgent care center for non-emergency medical issues, such as:

- ✓ Fever
- ✓ Cold and flu
- ✓ Respiratory infections
- ✓ Sinus infections
- ✓ Sore throats

Did you know?

The emergency room is one of the most expensive places to receive care.

Better health is just a click (or call) away

To schedule a virtual visit, simply log in to your member account on priorityhealth.com and click on the MDLIVE™ link. Once logged in, select one of the available doctors and schedule a visit by video or phone. You'll get an email and a text message when the doctor is ready to see you.

PriorityHealth 
A healthier approach to health careSM

MDLIVE is a leading provider of on-demand health care services. Doctors are U.S. board certified and state licensed.

Get care from the comfort of your couch

It takes less than 15 minutes from the time you request a virtual visit until you're speaking with a doctor. There's no waiting room—so you can spend your time recovering. If the MDLIVE doctor recommends a prescription, they'll send it to your local pharmacy.

Best of all? You won't pay more for the convenience of great care after hours. It's just \$45 or less, depending on your plan. And, just like an in-person doctor appointment, you can use your HSA, FSA or HRA accounts to pay for your visit.

*Virtual visits
are secure and
HIPAA compliant.*

GET STARTED

Save time. Set up your MDLIVE account for you and your dependents now. That way, when you need care, you can quickly log in to schedule your visit.
