

The major goals of Oakland University's general education program are to introduce students to a broad base of knowledge and to develop their analytical and evaluative skills, creating a solid foundation for productive and fulfilling lives of leadership, innovation and service. The breadth of knowledge acquired through general education cannot be found in any single major.

Through its three-part structure of *foundations, explorations and integration*, the general education program complements the major to increase the student's flexibility and options upon graduation. All students must satisfactorily complete at least one approved course in each category listed below.
