- What do you see as the positives and negatives of this field?
- What are the career trends in this degree?
- Do I need to go to graduate school to get a job in this field?
- How do I get involved in research/internships?
- What types of technology are used and how are they used?
- What professional/student organizations would I benefit from joining?
- What courses do you recommend based on my career goals?
- Should I take major courses in a specific order?
