Dear Dr. Hanna,

We want to thank for the support and encouragement you provided over these last four years. Having you as a PRISM mentor truly helped ease many of the difficult times of medical school.

Despite your busy work week with your private practice, you were always warm and easy going. You knew how to put us at ease and reminded us not to take ourselves too seriously, like the time at our PRISM outing at Dave and Busters, you were challenged to a dance off and you took us up on it - you had some great moves!

Our group always had a spot of sunshine because of you. You shared advice and interesting stories, and facilitated conversations that helped the group open up.

You were the very best PRISM mentor that anyone could hope to have. We are blessed to have had you as our mentor and truly thankful for your dedication.

The "Grey's Hannatomy" PRISM group
